

PROJECT DEVELOPMENT PHASE

1. Dashboard Development

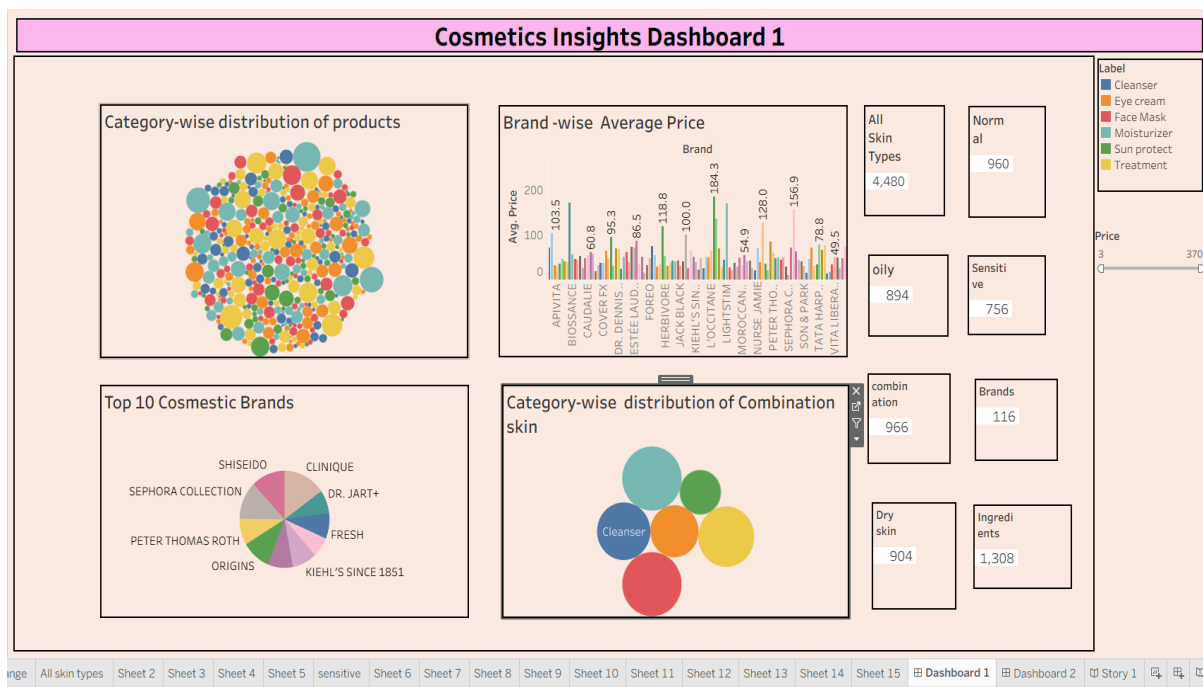

Two interactive dashboards were developed using Tableau to analyze cosmetic products, brands, pricing patterns, customer preferences, and market trends.

Dashboard 1: Cosmetic Insights Dashboard 1

Dashboard 1 provides a comprehensive overview of cosmetic products and consumer insights. It includes visualizations related to category-wise product distribution, brand-wise average price analysis, top cosmetic brands, and combination skin product analysis. Interactive filters allow users to analyze products based on categories, brands, prices, and skin types.

Dashboard 2: Cosmetic Insights Dashboard 2

Dashboard 2 provides detailed analysis of cosmetic products, customer preferences, and market trends. The dashboard includes visualizations such as top brands suitable for all skin types, category-wise revenue analysis, top products by product count, and price versus rank analysis using scatter plots.

2. Tableau Story

The Tableau Story integrates multiple dashboards and visualizations into a structured presentation format. It provides comprehensive analysis of cosmetic products, market trends, pricing patterns, customer preferences, and brand performance.

3. Tableau Public Profile

The Tableau Public profile contains all the published dashboards and story visualizations developed for the Cosmetic Insights project. It provides online access to the project outputs and supports interactive exploration of cosmetic market trends and consumer insights.
